---

The California Department of Resources Recycling and Recovery (CalRecycle), acting as the Enforcement Agency (EA) for San Luis Obispo County, will be holding this public information meeting regarding a new SWFP for North SLO County Recycling and Transfer Station. CalRecycle received the application for a new SWFP on July 10, 2017, and accepted it as complete and correct for filing on August 8, 2017. This public notice was prepared pursuant to Title 27, California Code of Regulations (27 CCR), Section 21660.3. The new full SWFP will allow the following:

- Combine the two existing registration tier permits into a new Full SWFP as a Large Volume Transfer/Processing Facility.
  - Facility Number 40-AA-0039, North SLO County Recycling, 174 tons per day of Construction and Demolition Material.
  - Facility Number 40-AA-0040, North SLO County Recycling Inc., 99 tons per day of Green Material and Green Material with Food Material.
- The continuation of all existing North SLO operations under the new Full SWFP.
- Increasing the maximum daily permitted processing capacity from a combined 273 tons per day to 500 tons per day (including source separated commingled residential and commercial recyclables.)
- Addition of commercial food material and municipal solid waste to the list of materials permitted for processing and handling.
- Construction of a new fully enclosed commercial food material processing facility, construction of new tipping floor and covered awning for municipal solid waste processing operations, and a new covered awning for the existing mixed green material/residential food material tipping floor to accommodate the expanded operations.

The EA is required to conduct a public informational meeting pursuant to 27 CCR 21660.2 to provide information to the public and receive comments on the EA's proposed action for a new SWFP. The decision to issue or deny the new SWFP will be made by the EA within 120 days of the date the application was accepted for filing.

If you would like to comment on this project you may do so at the meeting, or you may send your written comments to the EA contact listed above. The application package is available for public viewing\* between the hours of 9:00 a.m. to 5:00 p.m. at 1001 I Street, Sacramento, CA 95814.

For information on the appeals process pursuant to Public Resources Code Section 44307 to challenge the EA's issuance or denial of the new SWFP, you may contact Mr. Patrick Snider at (916) 324-3753.

\* An appointment with Patrick Snider is necessary for access into the building to review the application package.
